

CIPC

Service Delivery Standards – Our promise to our Customers

Important to note

- The standards are **an indication of the maximum time it will take to process 90% of received applications.**
- The Companies and Intellectual Property Commission (CIPC) is committed to maintaining and exceeding the 90% target performance of the service delivery standards. This is to allow CIPC to stabilize its internal resource environment. As customer centric organization, listed to International Standardization for Organizations (ISO) we will be dedicating much improvements efforts to customer-facing processes, such as query resolution and complaints management.
- CIPC will continue to maintain and improve on 90% performance on the standards, on condition that the below requirements are adhered to:
 - **Customers submit accurate and complete information.**
 - **The Customer's account has sufficient funds available for the transaction to be processed.**

In an effort to improve the customer facing processes and fulfill our customer centric principles, CIPC has introduced an on-line Query Resolution System. The system measures the resolution of a query within 10 working days from the date a query has been registered. The system requires a client to register a query, first, and get allocated a ticket as a reference number. The purpose of the system is to monitor the effectiveness of the service delivery standards. Thus, upon the expiry date of the service standard, the client can register on the system to enquire about the status of the lodged transaction/s.
