

Recommended Software Service Providers for Provisioning of XBRL Client-Side Solutions

The Software Service Providers (SSPs) below (in no particular order) are members of the CIPCs Software Service Providers Panel. The CIPC doesn't officially endorse any SSPs or their software solutions, but the solutions of the SSPs below have been assessed by the CIPC. It has been established that the minimum requirements of the CIPC are met by the solutions offered by the listed SSPs. The CIPC therefore recommends these SSPs to entities (*who are required to submit Annual Financial Statements to the CIPC via XBRL as from 1 July 2018*), for provisioning of XBRL capable software solutions.

Please note that it is the responsibility of every entity to engage with SSPs independently from the CIPC. It is not required for an entity to exclusively utilize the services of the SSPs listed below for provisioning of XBRL client-side solutions. Entities are allowed to use the services and solutions of any SSP of their choice, and the CIPC will not be responsible/liable for the outcome of engagement between entities and SSPs in any way.

Entities are encouraged to engage with different SSPs in order to identify the best-fit solution for their organisations. The levels of sophistication as well as costs various from SSP to SSP, because the solutions offered are in some cases aimed at large organisations who wish to integrate XBRL fully with back-end processes, with many additional benefits than tagging only. Others SSPs provide tagging-only solutions more applicable to small entities due to lower costs and simplicity. The CIPC cannot advise on the best-fit solution for a specific entity, or discuss pricing and license models offered by different SSPs. It is the responsibility of every entity to do their own research before they partner with a specific SSP.

The list below may be updated occasionally by the CIPC to add or remove SSPs as the CIPC deems necessary.

Information on features and license models can be provided by SSPs to entities as part of engagement between entities and SSPs.

Any SSP not currently on the CIPCs panel, who wants to join the panel, are welcome to engage with the CIPC via XBRL@cipc.co.za for information with regards to the requirements applicable to panel members.
